

Mennatullah Elsayy

Software Engineer

Female (She/Her) | Tauroggener Str., 10589, Berlin, Germany | +4917677055362 | mennatullahalii.dev@gmail.com | [linkedin.com/in/mennatullah-alii](https://www.linkedin.com/in/mennatullah-alii) | <https://mennatullahalii.github.io/> | <https://github.com/mennatullahalii> | **Work Authorization:** Full Work Authorization for Germany (No visa sponsorship required).

PROFILE

Software Engineer with a strong end-to-end product mindset with 6+ years of experience specializing in Frontend Development using Angular and modern web technologies and full stack development using Java Spring Boot and Nodejs. Skilled in building scalable applications across e-commerce, healthcare, and enterprise domains. Expert in frontend architecture, leading complex migrations, and implementing microfrontend architecture to deliver high-performance applications while collaborating with diverse, multicultural teams across multiple countries.

EXPERIENCE

Career Break & Relocation to Berlin, Germany	09/2025 – Present
- Successfully managed all relocation and integration processes following a move to Berlin. - Dedicated time to advanced technical development, focusing on expanding my Backend knowledge including microservices and event-driven architecture and exploring AI tools and features (Cursor, Claude). - Dedicated time to explore and use Angular 20+ features like Signals, zoneless change detection.	
Senior Frontend Engineer Jumia – Cairo, Egypt	11/2024 – 08/2025
Leading e-commerce platform in Africa - Architected and led the migration of a large-scale ecosystem of seven separate projects into a unified Nx Monorepo, significantly improving code sharing by 30%. - Implemented Microfrontends using Module Federation to enable independent deployments and enhanced scalability. - Minimized application bundle sizes by 25% by optimizing build configurations and implementing tree-shaking strategies for standalone architectures. - Managed the technical upgrade from legacy framework versions to Angular 19, introducing modern reactive patterns to the development team. - Leveraged AI-assisted coding tools (GitHub Copilot / Cursor) to accelerate the generation of comprehensive Cypress E2E and Jest unit testing suites, reducing test writing time and increasing code coverage. - Established high code quality standards through thorough unit testing with Jest and seamless integration with Jenkins CI/CD pipelines. - Collaborated with cross-functional teams to integrate complex REST APIs into frontend architecture. - Actively participated in peer reviews and Agile ceremonies to maintain a high-quality codebase.	
Frontend Developer Cegedim – Cairo, Egypt	07/2021 – 10/2024
Global healthcare technology and cloud services (IaaS/PaaS) - Contributed to backend services using Java Spring Boot to support full-stack feature requirements. - Contributed to the development of ITCare, a centralized cloud management platform, building interactive features for resource management using Angular. - Translated complex Figma designs into responsive, pixel-perfect, functional user interfaces, ensuring a seamless user experience across all devices. - Collaborated with UI/UX team to create centralized Design System using Storybook to ensure UI consistency and development efficiency. - Maintained long-term code quality using Jasmine for unit testing and GitLab CI for continuous integration. - Operated within a full Agile/Scrum workflow, utilizing Jira for sprint planning and progress tracking. - Enforced high code quality, clean code and security standards by utilizing SonarQube for automated static analysis and vulnerability detection.	
Full stack Engineer Asset Technology Group – Cairo, Egypt	07/2019 – 06/2021
IT Solutions and software development company - Developed Campaign Management System for Vodafone Egypt with advanced segmentation features. - Contributed to frontend and backend development using Angular & Java Spring Boot & Node.js (Express) - Managed the global state of the app using NGRX store	

Healthcare software solutions provider

- Contributed to development of hospital desktop application.
- Developed and maintained desktop and web applications using .NET and AngularJS.
- Gained critical experience working with legacy code systems and improving overall code maintainability.

EDUCATION

Bachelor's degree in Computer Science (Software Engineering Department)

2014 - 2018

Ain Shams University, Cairo

SKILLS

Frontend Core: JavaScript (ES6+), TypeScript, Angular, RxJS, NgRx, Signals, JWT, Frontend Security (CORS, XSS, CSRF).

Backend: Java Spring Boot, Node.js (Express), PostgreSQL, SQL, NoSQL, GraphQL, Docker, Microservices, Event-Driven.

Architecture & Tooling: Nx Monorepo, Microfrontends (Module Federation), Webpack, Vite.

Styling & UI: Tailwind CSS, SCSS, HTML5, Bootstrap, Storybook, Figma, Accessibility.

Testing & Quality: Jest, Vitest, Cypress, Playwright, Jasmine, Karma, Cucumber, A/B Testing, SonarQube, ESLint/Prettier.

Tools: Jenkins, GitLab CI, Git, Jira, Confluence.

AI & Productivity: GitHub Copilot, Cursor, Prompt Engineering for Code Generation, AI-assisted debugging, Claude.

Domain Knowledge: E-commerce, Healthcare, Telco, IaaS/PaaS Solutions.

ADDITIONAL INFORMATION

Languages: English (Fluent), German (A2), Arabic (Native).
